

D.I. ROOF SEAMERS

Roof Seaming. Easier.

contractor series select kits

NEW

These "Select Kits" are the answer for all your needs! One light-duty roof seamer chassis with tooling conversion kits to fit 1", 1.5", and 2" roof panels with ability to form a 90° or 180°* seamed profile. Simply change the tooling on your jobsite to fit most any panel you are seaming. Bi-directional option available when seaming 90° profiles.

The machine is self propelled with hands free operation. Built with a durable electric motor, it is equipped with a quick-disconnect plug for added safety and an onboard hour meter to keep track of usage and maintenance. Recommended for use with 24 gauge panels maximum. The machine is exceptionally lightweight, fast, and comes with a 6 month or 25 hour manufacturer's limited warranty and a Pelican iM2750 case.

**180° seam only for 1" and 1.5" profiles.*

Roof Seamer comes with option of 2 motors: 110v Motor (#70574) or 220v Motor (#70575)

Weight: 37 lbs.
Speed: 34.2 ft./min.
Dimensions: 13.5" x 13.5" x 12"

Only \$3,600!

Purchase price includes the roof seamer chassis, case, warranty, and your choice of ONE tooling kit above. Machine will come with tooling installed. Additional kits may be purchased separately (\$500 each) and come in a Pelican 1120 case with all tooling, rollers, wheels, shims, spacers, easy-to-read "Go-NoGo" gauges, and installation instructions.
